

GOELST®

Cord-Operation Track

5300

for light to semi heavy curtains

Stable rail with a slim design

5300

Cord control

The 5300 track, designed in aluminum, combines finesse and stability. Curtains glide silently thanks to a draw cord located at the end of the track. Its installation is easy, offering various mounting options, on the wall or ceiling. Highly appreciated, this track is available in white and natural metallic aluminum, accompanied by matching components.

- **Compatible with sheers, lightweight to medium-heavy curtains.**
- **The track can be fixed to the ceiling or wall using dedicated brackets.**

- **The aluminum track can easily be bent to different radiuses and to any radius larger than 100cm (40"). Due to its symmetrical shape this can be done in both horizontal directions**
- **The track is compatible with Flow gliders, or standard pinch-pleat carriers.**
- **Silent and smooth running, around bends.**

Other RAL colours and coatings on request.
High quality, hard-wearing coating, colourfast,
UV-resistant.
